Education

Don Mariano Memorial State University South Union Campus

Aug 2016 – Mar 2020

Bachelor of Science Computer Science

Work Experience

Front-End Developer

Jan 2022 – Nov 2025

Pilothouse Digital | Victoria, BC V8W 1X6, Canada

Tech stack: Svelte kit, Tailwind CSS, Node.js, Prisma, PostgreSQL, Supabase, Storefront API

- Developed a Headless CMS E-commerce solution for Shopify stores through backend migrations and service integrations, that had an impact on store scalability and modernization.
- Implement AI-powered component store generation through Svelte components and Tailwind CSS, that had an impact on faster development cycles.
- Achieved a high-performance Shopify store conversion through SvelteKit migration, that had an impact on site speed and user experience.
- Implemented seamless drag-and-drop functionality through custom module development, that had an impact on store page flexibility and usability.
- Created multiple modules (components) for a store template, enhancing the homepage, collection pages, and product detail pages (PDP).
- Implemented comprehensive cart functionality through Storefront GraphQL API integration, that had an impact on efficient e-commerce transactions.
- Enhanced store branding through DaisyUI theming, that had an impact on consistent customer experience.

- Added upselling capabilities through third-party Shopify integrations (Rebuy, reviews API), that had an impact on customer engagement and revenue
- Achieved reliable software quality through Vitest-based module and component testing, that had an impact on product stability.
- Formulated storefront GraphQL queries and mutations for headless CMS architecture.
- Initiated converting shopify liquid base and pixel-perfect design conversion for the site using Nuxt and Storefront GraphQL

Fullstack Developer

Jan 2021 - Dec 2022

ArchIntel Corp. | Tysons, VA 22182, Estados Unidos

Tech Stack: Vue, Node.js, MongoDB

- Developed a frontend system for a video interview platform through Vue.js development, that had an impact on productivity for seven users including video editors.
- Achieved continuous system reliability through maintenance of the social media chassis, that had an impact on smooth US team operations.
- Developed a digital asset library system through Node.js, MongoDB, and React, that had an impact on secure file storage and accessibility.

Fullstack Engineer

Jan 2020 - Dec 2021

Elite Anywhere Corp. | Indio, CA 92203

Tech Stack: Vue, Material-UI, Laravel

- Migrating of a logistics web application through Laravel Vue SPA implementation, that had an impact on improved user experience and system performance.

Jr. Web Developer

Jan 2019 - Dec 2020

Baguio City

Tech Stack: Vue.js, Vuetify, Node.js, Firebase

- Developed Skood (Admin Dashboard) Food Delivery App of Baguio City.
- Achieved a city-wide food delivery platform (Skood) through dashboards for admins, sellers, and riders, that had an impact on efficient order dispatching and local commerce growth.
- Implemented backend dispatching automation through server-side Node.js and Firebase, that had an impact on faster order processing and operational efficiency .
